WOLSELEY

INDUSTRIAL GROUP

VALVE ACTUATION SPECIFICALLY ADAPTED TO YOUR NEEDS

Wolseley Industrial Group and their partnerships supply automated Quarter Turn and Rising Stem valves in accordance with the strictest standards and quality control in the industry. Actuated valves, which are powered by Pneumatic, Hydraulic or Electric operators, come complete with accessories such as solenoid valves, FRG's, Limit Switches and Positioners for modulating control. These accessories are selected to be compatible with any of the current communications protocols that you may be using. Our automated valves are supplied to you in accordance with your requirements and are all functionally tested and cycled before shipping.

ACTUATION & CONTROLS

Wolseley Industrial Group has accumulated decades of experience when it comes to actuation and controls, not limited to our own valve brand. We are able to automate any valve with any appropriate actuator regardless of manufacturer.

Wolseley Industrial Group Valve Automation Shops have the necessary conventional machine tools needed for your valve modifications, bracket & coupling manufacturing and all other fabrication that you may require. These tools provide the capability for: Turning, Milling, Drilling, Boring and much more.

Automation and Testing of
1/4 Turn Valves

Automation and Testing of rising stem valves including Knife Gates,
Wedge Gates, Globes & ect.
